A motivated self-learner who has 7 years of coding experience and 5 years of SAS RGF solution and Management experience including EGRC, GCM and MRM with the successful delivery of multiple RGF projects in the middle east region

Work Experience

The Risk Advisors

September 2018 - 2022

- Worked as a **Technical Consultant** at the Project Lead level to deliver an end to end SAS RGF and VA projects.
- Developed **Educational web-platforms** for Institutes on ASP. Net framework using C Sharp as backend language and HTML, CSS and JavaScript as front-end.
- Provided services as **technical interviewer** and team manager as it was a new startup.

The Risk Advisors

January 2022 - Present

- Working as a **Senior Support** to ensure a smooth flow of project deliveries.
- Working with the sales team in **configuration for upcoming project demos**.
- Working as **R&D and developing new features** in the SAS RGF solutions to help the sales team maintain a healthy pipeline of upcoming projects.

Key Achievements

- Exploration of **Groovy in SAS RGF solutions** that unlocks an endless potential in it's mass adoption.
- Implementation of **AI suggestions** using Natural Language Processing in SAS RGF Solution.
- Development of **Smart Object** script that automates the configuration of new objects and provides utility to auto-create loader, screen, configurational files, customization files, and provides a startup workflow.
- Scripts to semi-automate the **migration** from SAS EGRC to GCM solution
